

Small & General Business Tax Break

Monday, 18 May 2009

The Small Business and General Business Tax Break was announced on 3 February 2009 as part of the Government's Nation Building and Jobs Plan. The Tax Break extends and expands the temporary investment allowance announced in December 2008.

All hardware and appliances available from Techplus qualify under the Tax Break so your business can claim up to 50% of the purchase price back in your tax return.

ISP's can purchase our high-speed Allot NetEnforcer equipment and also cut the spiraling cost of P2P traffic.

Educational institutions can purchase our Cymphonix Network Composer products and control their students use of the internet.

Business's can purchase our Astaro UTM Firewalls and protect their network from threats.

For more information on the tax break see:
